**Subject:** Delay the public hearing

I just received the email announcing the date of the QAP Public Hearing as April 2, 2012. Given the release of the draft QAP on March 16<sup>th</sup>, the public hearing will occur just 17 days after the publication of the draft. Developers need time to review the draft and make recommendations on changes. LAAHP plans on soliciting its members to obtain their feedback and then present a reasoned and practical response to the draft. Seventeen days is too short a period for such a response.

LAAHP suggests that the public hearing be held on April 11, the date of the next LHC board meeting, at 9:00, just prior to the usual LHC start time of 11:00.

We hope that you will consider our suggestion and delay the public hearing to April 11<sup>th</sup> at 9:00.
