The Village of Pleasant Hill has 31 low income housing units. These units stay full. 28 out of 31 or occupied at this time. Some of these tenants have lived in these apartments for years. I have spoke with some of these tenants, and they would like these units to be more weatherized and maybe painted on the inside and some say they need newer appliances. My suggestion would be after some work on the inside of the units, maybe plant some shrubs and trees outside. Also, there are so many children that grow up in these units, it would be nice for them to have a small park, or just a small basket ball court.
