Narrative

NARRATIVE: FEDERAL CITY BUILDING 10 The proposed Federal City Building 10 Apartment Development located in Orleans Parish will set a new standard in disaster-resilient family housing in this flood prone area of the state. The seventy-six unit one and two-bedroom senior/elderly complex will be in an area of the parish that has historically been underserved in terms of affordable, senior housing. The development will include a community center on site for use of the tenants at no charge, as well as the community. It will be financed with proceeds from tax exempt bonds, low-income housing tax credit equity, CDBG-DR funds and financing from the general partner. The development will also include many optional facility amenities consistent with the Louisiana Housing Corporations annual Qualified Allocation Plan. There is a demonstrated need for quality affordable housing in Orleans Parish, and in the Algiers District in particular. Much of the current housing in the area is aging with a growing amount of property blight. To make matters worse, many areas of Orleans Parish are prone to flooding. The proposed Federal City Building 10 Development will help alleviate a shortage of low-income family housing in this area of the parish while also providing the highest standards of disaster resiliency. The Federal City Building 10 Development will employ state of the art disaster resilient construction standards previously unutilized in Ouachita Parish. The development construction will include: • An elevated building footprint even though the selected site is not in a flood zone • Onsite backup power generators • Onsite potable water source • Fortified Gold construction standards • Water permeable pavement • Wind resistant construction • Flood hardy materials • Surface storm water management • Flood proofed design with resilient energy systems Federal City Building 10 Apartments is designed to meet a significant need for low-income housing in an underserved area of Orleans Parish. The “Great Floods” of 2016 severely damaged the available low-income housing supply in the parish. This proposed development will be a benchmark for disaster resilient housing in the community and will set higher standards consistent with the goals set forth by the Louisiana Housing Corporation in its Prime NOFA.
